M&IW's Sustainable Responsibility Impact Statement

Committed to creating lasting positive change for our planet, people, and communities. Because we are all responsible.

M&IW is passionate about the environment and the people and communities we live, work, and do business in. We understand that companies like ours are expected to lead with purpose and responsibility.

We are focused on leveraging our existing partnerships and building new relationships that will support our efforts to make sustainably responsible meetings, events, and incentives a standard in our industry.

We depend on our people to implement our program, which in turn depends on our partners to develop, implement, maintain, and innovate solutions geared towards eliminating food waste and single-use plastics.

Through actions and solutions, we will help create a world without waste as we lead with sustainable responsibility.

People	Empower all people who deliver and attend our events to thrive at work, at home, and in their communities.
Communities	Improve the vitality and resilience of our local communities.
Planet	Enable our customers and partners to impact the future through our expanded services.
